

ABSTRACT

A modular jack (41) in which a modular plug (75)  
5 is plugged, comprises a housing body (42) including a  
cavity (52) at a front side thereof in which the modular  
plug (75) is plugged and a rear wall (56) having openings  
(57 and 58) and fixed portions (59 and 60), and a plurality  
of terminals (43-50) fixed to the fixed portions (59 and  
10 60) and extend to the cavity (52) in a form of cantilevered  
beams supported by the fixed portions (59 and 60).
